

Divider-Module VT6 Art.-No. 490-00001

Application

The divider-module VT6 is used for the connection of max. six encoders or VT5 divider. The divider-module VT6 makes not possible, in contrast with the VT5 module, to connect PRESET-lines direct.

Connections (6x) for VT5 modules
or encoders (for example without PRESET-connection)

Connection for bus-lines of the control	
PIN 1	Address +
